- ▶ **GE, MABE** ( Mexico )
- ▶ **CARRIER** ( Korea )
- ▶ **Etc...**

# PRODUCTION ITEM

## (1) FILTER DRYER

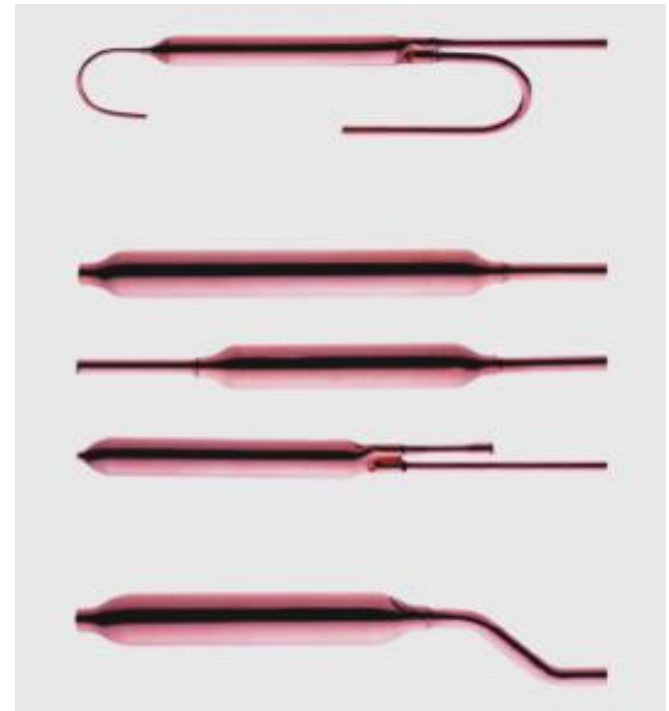

- ▶ **Double In-Let Type Dryer**

Mainly for OEM customers.

- ▶ **Service dryer**

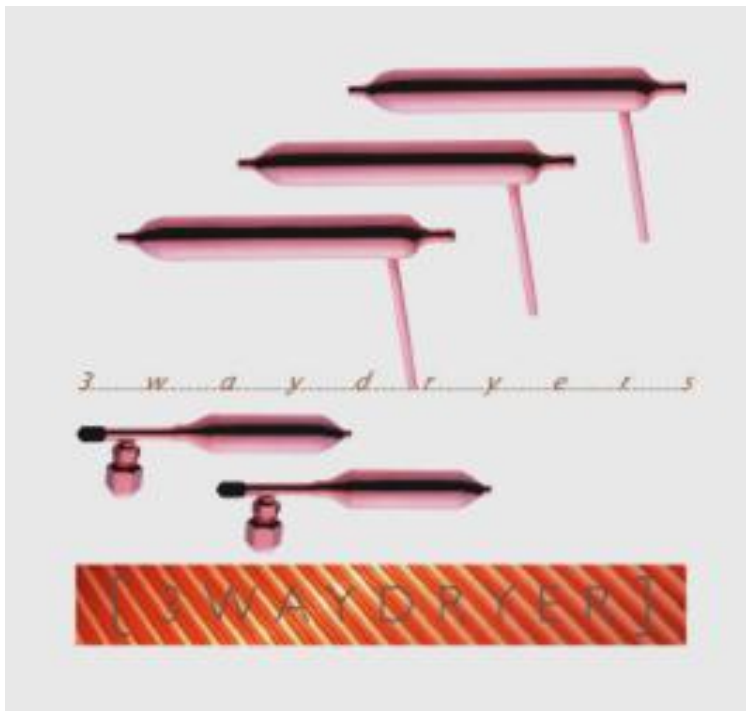

Various shape of copper tube is welded on dryer. Designed for A/S line.

# (1-2) FILTER DRYER

## ▶ Side Arm Type Dryer

Vacuum and Charging Pipe is moved from in-let area to Body of dryer. Productivity and leakage problem will be tremendously improved on mass production line.

## ▶ Spring loaded dryer

Spring is installed inside of dryer to relieve the shock of molecular sieve, which can have damage by inflowing high pressure of refrigerants gas.

Mainly for show case, ice cube machine, and Air-conditioner.

## (2) PACKING METHOD OF DRYER

---

### ▶ PLASTIC CAP PACKING

Perfectly protect the product from moisture in the air, but production cost may increase due to package expense.

### ▶ VACUUM PACKING

It is convenient for use in mass production line and effectively protects the product from moisture in the air.

---

## (2) PACKING METHOD OF DRYER

---

▶ PLASTIC CAP WITH TIN CAN

▶ VARIOUS TIN CAN PACKING

Protect from the air by Nitrogen gas filling process.

This package method can last longer than 1 year. Designed for mass production line.

---

# (3) ACCUM. & MUFFLER

---

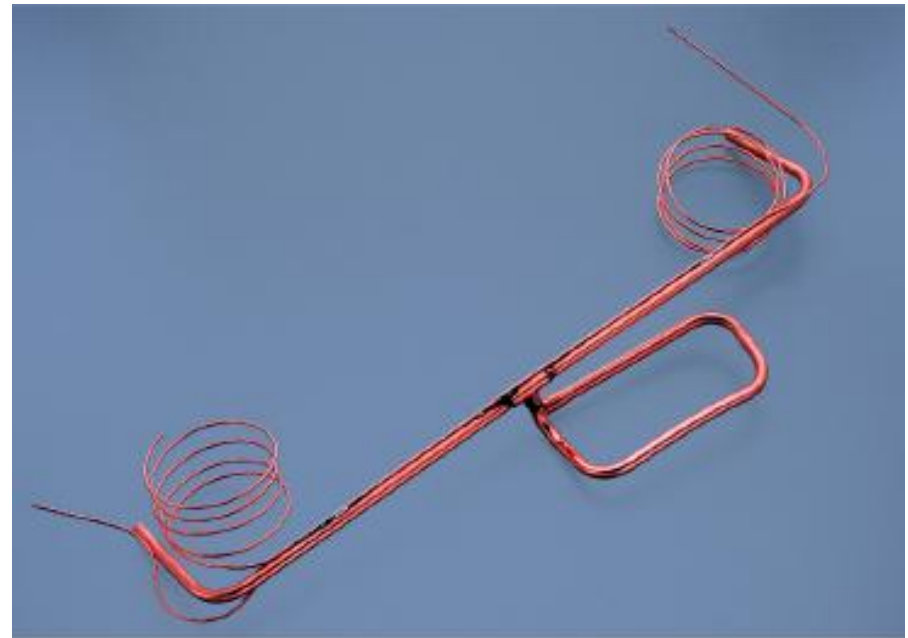

# (4) DISTRIBUTOR

---

# (5) HEAT EXCHANGER

---

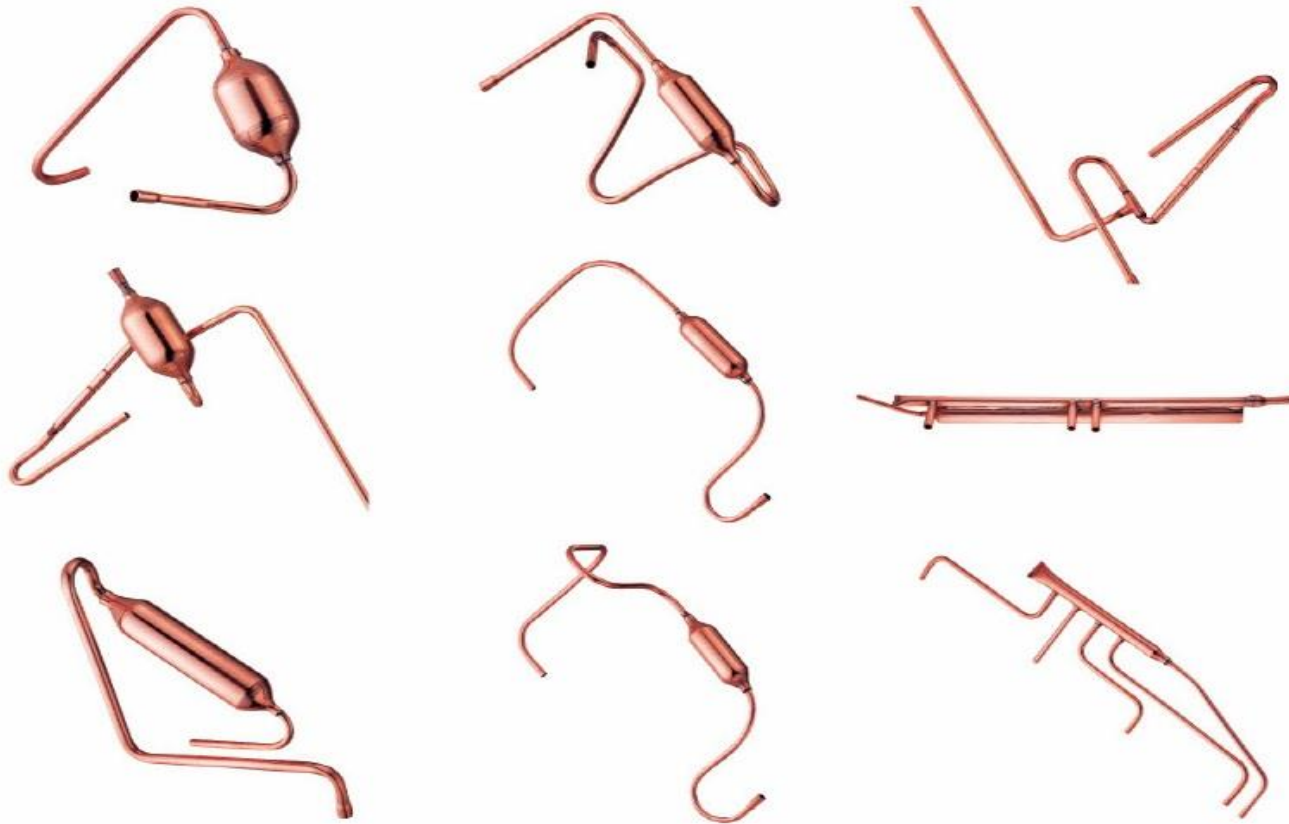

# (6) WELDING & BENDING
